

## DS-K5604A-3XF/V Face Recognition Terminal

DS-K5604A-3XF/V face recognition terminal is a kind of access control device integrated with temperature screening function, which supports plug & play (rapid deployment, free of wiring, installation, or configuration). It can fast take skin-surface temperature, which can be widely applied in multiple scenarios, such as enterprises, stations, dwellings, factories, schools, campus and so on.

### Available Model

DS-K5604A-3XF/V

### Features

- Plug & play  
Supports rapid deployment. Free of wiring, installation, or configuration.
- Supports Vanadium Oxide uncooled sensor to measure target's temperature
- Temperature measuring range: 30 °C to 45 °C (86 °F to 113 °F), accuracy:  $\pm 0.5$  °C without black body calibration
- Recognition distance: 0.5 to 1.5 m
- Fast temperature measurement mode: Detects face and takes skin-surface temperature without identity authentication
- Multiple authentication modes with temperature measure are available
- Face mask wearing alert
- If the recognizing face does not wear a mask, the device will prompt a voice reminder. At the same time, the authentication or attendance is valid.
- Forced mask wearing alert  
If the recognizing face does not wear a mask, the device will prompt a voice reminder. At the same time, the authentication or attendance will be failed.
- Displays temperature measurement results on the authentication page
- Triggers voice prompt when detecting abnormal temperature
- Configurable door status (open/close) when detecting abnormal temperature
- Transmits online and offline temperature information to the client software via TCP/IP communication and saves the data on the client software
- Integrated design with stand bracket

- Communicates with the third-party turnstile via IO output or Wiegand
  - Adjustable supplement light brightness
  - High performance processor with deep learning algorithm
  - 50,000 face capacity, 100,000 event capacity
  - Face recognition duration  $\leq 0.2$  s/User; face recognition accuracy rate  $\geq 99\%$
  - Transmits and saves the comparison results and the captured pictures to the client software or others
  - NTP, manually time synchronization, and auto synchronization
  - Watchdog design for protecting the device and ensuring device running properly
  - Audio prompt for authentication result
- \* Biometric recognition products are not 100% applicable to anti-spoofing environments. If you require a higher security level, use multiple authentication modes  
In order to get an accurate temperature, after the device is powered on, you should wait for 90 min to warm the device up.**
